Projects

URL Shortener | *Java, Spring Boot, Redis, PostgreSQL*

- Developed a URL shortening service with REST APIs, custom aliases, and URL expiration support.
- Implemented Redis caching to reduce repeated database lookups and improve redirect response latency.
- Designed PostgreSQL persistence for storing URL mappings, expiration metadata, and usage statistics.
- Added click analytics to track visit counts and usage statistics for shortened URLs.

Stock Portfolio Tracker | *React, FastAPI, PostgreSQL*

- Built a full-stack portfolio tracker supporting stock watchlists, holdings, and profit/loss analytics.
- Integrated external market data APIs to retrieve live stock prices and portfolio performance data.
- Developed REST APIs with FastAPI for portfolio data retrieval and management.
- Designed responsive dashboards to visualize holdings, market prices, and portfolio performance.

AI Resume Analyzer | *Python, AWS, OpenAI API*

- Developing an ATS-style resume analyzer that evaluates resumes against job descriptions using LLMs.
- Implementing semantic skill matching to identify relevant skills and gaps between resumes and job requirements.
- Generating resume scores and personalized recommendations based on job-specific requirements.
- Building an interactive interface for resume upload, job description analysis, and automated feedback.
